

1250

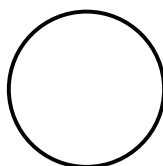

The **1250** is the top of the line in lateral arm retractable awnings.

The unique shoulder is compact and designed to level the awning automatically as it fully retracts and it has a stainless steel chain.

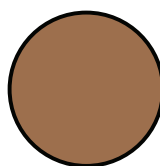

The **1250** is a semi enclosed awning that that protects the fabric and prevents birds from nesting. It is ideal for applications where the awning is exposed, such as roof mount installations. Available in widths up to 30' and max projections of 13'-1", crank or motorized.

SEMI-CASSETTE

THE SUMMERSPACE[®] SEMI-CASSETTE RETRACTABLE AWNING has clean, elegant styling, and its greatest attribute is the added protection it gives to your fabric. The semi-cassette covers not only the top and sides of the fabric roll, but also the back. This ensures that your beautiful fabric is completely protected when retracted, giving it longer life with color that lasts for years to come. The cassette's sides have a sleek, aerodynamic design that conveys luxury and sophistication, making it a perfect accent to your home's exterior. This awning is designed for both wall and roof mount applications.

Shown in OPEN position (fully extended) with optional solar drop screen (Chalk P06)

Shown in CLOSED position (fully retracted) with optional roof mount brackets
